

Donato Magarielli (Male) got master's degree in Electronic Engineering and a postgraduate degree in methodologies and technologies supporting collaborative design in the new product development process within aerospace value network. He has been working in Avio Aero Digital Technology organization since 2012, initially acting as product owner for the computer-aided experimental testing tools and a test data management application. Since 2014 he has been acting also as technical product manager for the computer-aided engineering tools, simulation data management application, and HPC facilities used in Avio Aero. Nowadays, he is leading the EU-funded Lexis project in Avio Aero.
