

Lilla Koloszar (female) obtained her Master of Science from Budapest University of Technology and Economics in 2004. She then followed the VKI Diploma Course in 2004-2005 and obtained her PhD in 2011 from ULB, performing research in aero acoustics. Since December 2011, she has been working as a Research Engineer at the VKI on the DEMOCRITOS project in collaboration with SCK•CEN as support for the thermo-hydraulic studies of the MYRRHA reactor. She is in charge of the OpenFoam and HPC activities at VKI.
