# MERIC: Energy-efficient approach for your EuroHPC project

Ondrej Vysocky, _Matej Spetko_, Lubomir Riha

- Automatized workflow for parallel application analysis and tuning for energy savings – static and dynamic tuning
  - Multi-platform support – Intel, AMD, OpenPOWER, NVIDIA
  - Energy measurement – RAPL, HDEEM, OCC, NVML, DiG

- 10-30 % energy savings

- RADAR: GUI tool for visualization of dynamic application behavior

- Continuous performance benchmarking

- H2020 projects
