To carry out the calculations for the project described in the abstract, we benefited from a number of computational HPC grants:

- ISCRA project AI-H-QMC, HP10BGJH1X, PI: Dr. Andrea Tirelli. This project gave us access to the Marconi100 supercomputer at CINECA, Italy
- PRACE project No. 2019204934, PI: Prof. Sandro Sorella. This project gave us access to the Galileo and Marconi100 supercomputers at CINECA, Italy
- HPCI System Research Project (Project ID: hp210038), PI: Dr. Kousuke Nakano. This project gave us access to the Fugaku supercomputer the RIKEN Center for Computational Science, Japan
