Hands-on session with advanced features and parallel computation

Thursday, 17 April 2014 13:30 (1 hour)

The participants can continue to study the cases using the command line
interface. Simple modifications and parallel operation can be tested.
Finally, users can get some guidance how their own problems could be solved
using Elmer finite element software.

Session Classification: Elmer - Finite Element Software for Multiphysical Problems

Track Classification: Elmer - Finite Element Software for Multiphysical Problems
