

Dr.-Ing. Bernd Mohr

Deputy Head, Application Support Division, Jülich Supercomputing Centre

Bernd Mohr started to design and develop tools for performance analysis of parallel programs already 1987 at the University of Erlangen in Germany. During a three year Postdoc position at the University of Oregon, he designed and implemented the original TAU performance analysis framework. Since 1996 he has been a senior scientist at Forschungszentrum Jülich. Since 2000, he is the team leader for the group "Programming Environments and Performance Optimization". Besides being responsible for user support and training in regard to performance tools at the Jülich Supercomputing Centre (JSC), he is leading the Scalasca and Score-P performance tools efforts in Jülich.
